About EHS

Mission

Environmental Health and Safety supports and enriches Texas A&M University by providing quality programs and services that instill safety, health, and environmental stewardship.

Vision

We pledge to ensure that Texas A&M provides the highest standard in health, safety, and environmental protection.

Core Values

Safety: We believe safety is paramount.

Communication: We provide education and assistance.

Cooperation: We work together to achieve excellence.

Integrity: We value respect, virtue, and professionalism.

Introduction

Welcome

The EHS Training Catalog offers a diverse selection of training opportunities to encourage safety awareness, promote learning enhancement, and foster professional growth with job-specific subjects. We continually review and update our courses and strive to offer the most current content on each topic, ranging from awareness-level to more advanced technical training. New courses are added frequently, so we encourage you to visit often.

Training Formats

EHS offers interactive, online training to be completed at your own pace and convenience. We also conduct in-classroom training, either scheduled at regular frequency or by request.

Accessibility

All online EHS courses are available in alternative formats, such as Word, PowerPoint, or PDF documents. Contact ehstraining@tamu.edu to request an accessible version of any online course, or to request a more accessible option for in-person training.

Contact Us

If you have questions, need training assistance, or would like to offer suggestions, please contact ehstraining@tamu.edu.

Course Instructions

Each course has a specific delivery format and is identified by an icon that is hyperlinked directly to the appropriate course access/registration page or contact information to assist with enrollment. These courses should be accessible to all Texas A&M entities. Below are the access instructions for the delivery formats offered:

A. TrainTraq or EHSA: Online

- 1) **TrainTraq** – Faculty, staff, and student employees will access TrainTraq courses through Single Sign On (SSO) at sso.tamug.edu. Log in by using the Texas A&M Campus or Agency Login, entering your NetID and password or UIN Login, entering your UIN and password.

At the SSO Menu:

- Choose TrainTraq. Click “Course Catalog” tab at top.
- Enter the TrainTraq course name, number, or keywords to search.
- Select course name. Click “Start Course” to begin training.

Note: All courses have an acknowledgement or quiz at the end of the training.

- 2) **TrainTraq External Gateway** – Students, visitors, or personnel *not affiliated with Texas A&M* may access these courses through the external user gateway. Please contact ehstraining@tamug.edu for login and access information, as the password changes regularly.
- 3) **EHSA** – Some radiological safety online courses are hosted at <https://ehsdtraining.tamug.edu>. Log in with your NetID and password, then select the course from the list.

B. Classroom Training: In-person By request

Some EHS trainings are available in a classroom setting that is instructor-led at our office at 400 Harvey Mitchell Parkway South, Suite 100, College Station, TX 77845 or offsite at a Texas A&M campus location. Contact ehstraining@tamug.edu for more information.

Course Listing, By Title

- Accelerator Training for Non-Human Use
- Aerial Lift Safety
- All-Terrain Vehicle (ATV) and Utility Task Vehicle (UTV) General Safety
- Asbestos Awareness
- Audiogram
- Automated External Defibrillator (AED) Awareness
- Cattle Handling Safety
- Chemical Segregation and Storage
- Confined Space
- Crowd Manager – General Training
- Crowd Manager – Supervisor Training
- Crowd Manager – Venue Specific Training – Aggie Park
- Crowd Manager – Venue Specific Training – Davis Diamond

- Veterinary Teaching Hospital Radiation Producing Device (RPD)
- Veterinary Teaching Hospital Radiation Safety Awareness
- Wet Lab Radiology

Respiratory Protection

- Quantitative Fit Testing and Respiratory Protection

Utilities & Energy Services

- Excavation Safety-Competent Person Training for Utilities & Energy Services (UES)
- Hearing Conservation Training for Utilities & Energy Services (UES)
- SPCC Awareness & Tank Inspector Training for Utilities & Energy Services (UES)

Course Descriptions, By Title

Accelerator Training for Non-Human Use 	
Description: This course covers radiation safety fundamentals for accelerator users. It is also offered as a two-year refresher training for accelerator users.	
Delivery Format: Online (EHS)	Audience: Employees who work around and with accelerators.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Aerial Lift Safety 	
Description: This course will educate employees on the safe operation of aerial lifts and how to identify and avoid associated hazards.	
Delivery Format: Online (TrainTraq #2114395)	Audience: Employees who operate aerial lifts or work in areas with aerial lifts.
Contact: ehstraining@tamu.edu	Category: General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

All-Terrain Vehicle (ATV) and Utility Task Vehicle (UTV) General Safety 	
Description: This course consists of safety information for general use of ATVs and UTVs.	
Delivery Format: Online (TrainTraq #2111255)	Audience: Employees who operate ATVs.
Contact: ehstraining@tamu.edu	Category: Agriculture
Course Equivalent: All-Terrain Vehicle (ATV) and Utility Task Vehicle (UTV) General Safety- TrainTraq #2111256	
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Online

In-person

By Request

Asbestos Awareness 	
Description: This course provides a general awareness of asbestos, identifies what materials may contain asbestos, and explains how these materials should be handled on campus. It may also be used as a refresher after completing the initial Asbestos Awareness training.	
Delivery Format: Online (TrainTraq #211131)	Audience: All Employees
Contact: ehstraining@tamu.edu	Category: Asbestos
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Audiogram 	
Description: EHS conducts noise surveys on campus and provides annual audiograms to employees who are exposed to elevated noise levels at work through the Hearing Conservation Program. This audiogram (hearing test) is conducted annually and should follow hearing conservation training,	
Delivery Format: Online (TrainTraq #2114710)	Audience: All Employees
Contact: noise@tamu.edu	Category: Hearing Conservation

Automated External Defibrillator (AED) Awareness 	
Description: This course defines the basic functions of AEDs, potentially life-saving devices found in many Texas A&M University facilities, and how and when they should be used.	
Delivery Format: Online (TrainTraq #2112937)	Audience: All Employees
Contact: ehstraining@tamu.edu	Category: Automated External Defibrillators
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Online

In-person

By Request

Cattle Handling Safety 	
Description: This course provides safety information for cattle handling.	
Delivery Format: Online (TrainTraq #2111251)	Audience: Employees who may work with cattle.
Contact: ehstraining@tamu.edu	Category: Agriculture
Course Equivalent: Cattle Handling Safety- TrainTraq #2111253	
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Chemical Segregation and Storage 	
Description: This course provides guidance for the proper segregation of chemicals and defines the chemical storage requirements for laboratories on the Texas A&M University campus.	
Delivery Format: Online (TrainTraq #2113461)	Audience: Any and all personnel working with or in proximity to hazardous chemicals.
Contact: ehstraining@tamu.edu	Category: Laboratory Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Confined Space  	
Description: This course reviews the Texas A&M Confined Space Entry program.	
Delivery Format: In-Person (By Request) (TrainTraq #211415)	Audience: Employees who may enter confined spaces.
Contact: ehstraining@tamu.edu	Category: General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Crowd Manager – General Training 	
Description: This course provides guidance to crowd managers and crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons.	
Delivery Format: Online (TrainTraq #2114474)	Audience: Crowd Managers and Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety

Online

In-person

By Request

Crowd Manager – Supervisor Training 	
Description: This course provides guidance to crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons.	
Delivery Format: Online (TrainTraq #2114475)	Audience: Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety
Course Prerequisite: Crowd Manager – General Training – TrainTraq #2114474	

Crowd Manager – Venue Specific Training – Aggie Park 	
Description: This course provides guidance to crowd managers and crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons at the Aggie Park venue.	
Delivery Format: Online (TrainTraq #2114476)	Audience: Crowd Manager and Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety
Course Prerequisite: Crowd Manager – General Training – TrainTraq #2114474	

Crowd Manager – Venue Specific Training – Davis Diamond 	
Description: This course provides guidance to crowd managers and crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons at the Davis Diamond venue.	
Delivery Format: Online (TrainTraq #2114568)	Audience: Crowd Manager and Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety

Crowd Manager – Venue Specific Training – E.B. Cushing Stadium 	
Description: This course provides guidance to crowd managers and crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons at the E.B. Cushing Stadium venue.	
Delivery Format: Online (TrainTraq #2114569)	Audience: Crowd Manager and Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety

Online

In-person

By Request

Crowd Manager – Venue Specific Training – Ellis Field 	
Description: This course provides guidance to crowd managers and crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons at the Ellis Field venue.	
Delivery Format: Online (TrainTraq #2114570)	Audience: Crowd Manager and Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety

Crowd Manager – Venue Specific Training – Hildebrand Equine Complex 	
Description: This course provides guidance to crowd managers and crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons at the Hildebrand Equine Complex venue.	
Delivery Format: Online (TrainTraq #2114639)	Audience: Crowd Manager and Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety

Crowd Manager – Venue Specific Training – Mitchell Tennis Center 	
Description: This course provides guidance to crowd managers and crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons at the Mitchell Tennis Center venue.	
Delivery Format: Online (TrainTraq #2114637)	Audience: Crowd Manager and Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety

Crowd Manager – Venue Specific Training – Olsen Field at Blue Bell Park 	
Description: This course provides guidance to crowd managers and crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons at the Olsen Field at Blue Bell Park venue.	
Delivery Format: Online (TrainTraq #2114638)	Audience: Crowd Manager and Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety

Online

In-person

By Request

Crowd Manager – Venue Specific Training – Watts Cross Country Course 	
Description: This course provides guidance to crowd managers and crowd manager supervisors who are required to attend public events with gatherings of 250 or more patrons at the Watts Cross Country Course venue.	
Delivery Format: Online (TrainTraq #2114640)	Audience: Crowd Manager and Crowd Manager Supervisors
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety

Dry Ice Shipping 	
Description: This course provides the information necessary to prepare and offer shipments containing dry ice (UN1845) used as a refrigerant for non-dangerous goods. This training does not authorize shipment of biological materials, chemicals, radioactive materials, lithium batteries, or other hazardous materials.	
Delivery Format: Online (TrainTraq #211140)	Audience: Anyone who prepares, packages, marks, labels, documents, or offers a dry ice shipment for transportation must complete this training before performing those duties.
Contact: ehstraining@tamu.edu	Category: Hazardous Material Shipping

Excavation Safety-Competent Person Training for Utilities & Energy Services (UES) 	
Description: This course covers the requirements and role of Competent Persons overseeing the excavation work conducted at Texas A&M; it defines hazards related to excavation work, describes work practices and selection of protective systems to safeguard against cave-ins; and communicates measures to be taken for safe entry and exit.	
Delivery Format: Online (TrainTraq #2114268)	Audience: UES Employees working in and around excavations and the role of Competent Person assigned to such worksites.
Contact: ehstraining@tamu.edu	Category: UES

Online

In-person

By Request

Forklift Safety and Operations 	
Description: This course will educate employees on forklift safety and operations. All employees who work in a facility where forklifts are operated should complete this course.	
Delivery Format: Online (TrainTraq #211414)	Audience: Any employee operating forklifts or working in an area with forklifts. Forklift Certification requires this training, followed by a hands-on practical.
Contact: ehstraining@tamu.edu	Category: General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

General Awareness Training (DOT/IATA Hazardous Material Shipping)  	
Description: This course provides familiarity with DOT and IATA regulatory requirements for shippers of hazardous materials/dangerous goods and to enable the employee to recognize and identify hazardous materials consistent with the hazard communication standards of the DOT/IATA regulations.	
Delivery Format: In-Person (By Request) (TrainTraq #211142 to register)	Audience: Individuals shipping hazardous materials and dangerous goods within the requirements of DOT/IATA regulations.
Contact: ehstraining@tamu.edu	Category: Hazardous Material Shipping

General Radiation Safety for the Electron Beam Facility 	
Description: This course covers radiation safety fundamentals for electron beam users. It is also offered as a two-year refresher training for electron beam users.	
Delivery Format: Online (EHS)	Audience: Employees who work at the Electron Beam Facility.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Online

In-person

By Request

General Radiological Safety (Initial)  	
Description: This course covers the basics of radiation safety, state regulations, how to order radioactive materials, and how to schedule waste pickups. It is required by state law for all radioactive material users.	
Delivery Format: In-Person (Scheduled)	Audience: Employees who handle radioactive materials in the lab. To be completed prior to handling.
Contact: radiological-safety@tamu.edu	Category: Radiological Safety

General Radiological Safety Refresher 	
Description: This course is offered as a two-year refresher training for users of radioactive materials. All RAM users who completed the classroom training must complete the online refresher training every two years.	
Delivery Format: Online (EHS)	Audience: Employees who handle radioactive materials in the laboratory, every two years after completing initial training.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

General Stormwater Awareness 	
Description: This course covers stormwater management for Texas A&M; defines stormwater, municipal separate storm sewer systems, and potential pollutants that may have an adverse effect on stormwater; and reviews stormwater management requirements for Texas A&M.	
Delivery Format: Online (TrainTraq #211408)	Audience: Employees that handle materials that may negatively impact stormwater.
Contact: ehstraining@tamu.edu	Category: Environmental Compliance
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Online

In-person

By Request

General Tractor Safety 	
Description: This course consists of the safety guidelines and operation procedure of smaller (20 - 30 hp) tractors. It provides good safety information for any model tractor, not just John Deere.	
Delivery Format: Online (TrainTraq #611031)	Audience: Employees that may operate tractors.
Contact: ehstraining@tamu.edu	Category: Agriculture
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Hands-on Fire Extinguisher  	
Description: This course will provide in-person practice using a portable fire extinguisher. You should complete the online training referenced below prior to contacting ehstraining@tamu.edu to schedule the hands-on portion.	
Delivery Format: In-person (By Request)	Audience: All Employees. May be required for certain staff and students.
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety
Course Prerequisite: Online Fire Extinguisher – TrainTraq #2114427	

Hazard Communication 	
Description: This course is an overview of labeling systems, reference materials, physical hazards, toxicology, and personal protective equipment. Content provided by the A&M System Office of Safety. Course developed by Employee & Organizational Development at Texas A&M University.	
Delivery Format: Online (TrainTraq #11020)	Audience: All personnel working with or in proximity to hazardous chemicals. May be used as a refresher every three years after initial training.
Contact: support@tamus.edu	Category: Laboratory Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Online

In-person

By Request

Hazard Communication for Non-Laboratory Personnel 	
Description: This course provides an overview of hazardous chemicals in the workplace, including labeling, exposure effects, reducing exposure potential, and spill response.	
Delivery Format: Online (TrainTraq #2114811)	Audience: All personnel working with chemicals in shops, warehouses, maintenance areas, or any other non-laboratory setting.
Contact: ehstraining@tamu.edu	Category: Laboratory Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Hazardous Material Shipping DOT 49CFR HMR  	
Description: This course introduces and provides instruction in the use of the regulation, tables, preparation of documents, marking, labeling, and packing for HM transport.	
Delivery Format: In-Person (By Request) (TrainTraq #2111178) to register	Audience: Individuals shipping hazardous materials and dangerous goods by ground.
Contact: ehstraining@tamu.edu	Category: Hazardous Material Shipping

Hazardous Material Shipping - Excepted Quantities/Small Quantities  	
Description: This course introduces and provides guidance in identifying and preparing hazardous materials that meet the regulatory requirements of Excepted Quantity/Small Quantity shipments.	
Delivery Format: In-Person (By Request) (TrainTraq #2111183) to register	Audience: Individuals shipping hazardous materials and dangerous goods in excepted or small quantities.
Contact: ehstraining@tamu.edu	Category: Hazardous Material Shipping

Online

In-person

By Request

Hazardous Material Shipping - Function Specific  	
Description: This course introduces and provides guidance in identifying and preparing specific hazardous materials that are shipped routinely, as required by IATA and DOT regulations.	
Delivery Format: In-Person (By Request) (TrainTraq #2111182 to register)	Audience: Individuals shipping specific hazardous materials and dangerous goods.
Contact: ehstraining@tamu.edu	Category: Hazardous Material Shipping

Hazardous Material Shipping - IATA DGR (International Aviation Transportation Association Dangerous Goods Regulations)  	
Description: This course introduces and provides guidance with the use of the IATA Dangerous Goods Regulations for shipping dangerous goods by air domestically and internationally.	
Delivery Format: In-Person (By Request) (TrainTraq #2111179 to register)	Audience: Individuals shipping hazardous materials and dangerous goods by air.
Contact: ehstraining@tamu.edu	Category: Hazardous Material Shipping

Hazardous Material Shipping - Infectious Substance DOT/IATA  	
Description: This course introduces and provides guidance in identifying Infectious Substance in accordance with IATA and DOT regulations, and instructions in preparation of shipment for air/ground transport.	
Delivery Format: In-Person (By Request) (TrainTraq #2111180 to register)	Audience: Individuals shipping infectious substances under DOT and IATA.
Contact: ehstraining@tamu.edu	Category: Hazardous Material Shipping

Hazardous Material Shipping - Radioactive Materials (RAM)  	
Description: This course introduces the relationship of activity, exposure, and isotopes required by the IATA and DOT regulations in the receiving and shipping of radioactive materials, to include the preparation of documentation, packaging, marking, and labeling of RAM.	
Delivery Format: In-Person (By Request) (TrainTraq #2111181 to register)	Audience: Individuals shipping radioactive materials under DOT and IATA .
Contact: ehstraining@tamu.edu	Category: Hazardous Material Shipping

Online

In-person

By Request

Hearing Conservation 	
Description: This course provides employees with a general awareness of noise, what work areas may present noise hazards, and how to prevent noise-induced hearing loss. It may also be used as a refresher.	
Delivery Format: Online (TrainTraq #2114059)	Audience: All employees and those that work in noisy environments.
Contact: ehstraining@tamu.edu	Category: Hearing Conservation
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Hearing Conservation Training for Utilities & Energy Services (UES) 	
Description: This course provides UES employees with a general awareness of noise, what areas may present noise hazards, and how to prevent noise-induced hearing loss. It may also be used as a refresher.	
Delivery Format: Online (TrainTraq #2114060)	Audience: All UES employees and those that work in noisy environments.
Contact: ehstraining@tamu.edu	Category: Hearing Conservation/UES

Heat Stress Awareness 	
Description: This course focuses on preventing heat stress, recognizing the signs of heat-related illness, and how to work safely in related hazardous conditions. It is intended for anyone that works in extreme heat or hot environments, including jobs that require you to be outdoors or physically active in hot and/or humid conditions.	
Delivery Format: Online (TrainTraq #2114293)	Audience: All Employees
Contact: ehstraining@tamu.edu	Category: General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Online

In-person

By Request

John Deere Gator HP Series Safety 	
Description: This course provides safety information for safely operating a John Deere Gator.	
Delivery Format: Online (TrainTraq #611032)	Audience: AgriLife employees who may operate a John Deere Gator.
Contact: ehstraining@tamu.edu	Category: Agriculture
Course Equivalent: John Deere Gator HP Series Safety- TrainTraq #711024	
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

John Deere Riding Lawn Equipment Safety 	
Description: This course presents a John Deere training video, reviewing how to use general lawn equipment safely.	
Delivery Format: Online (TrainTraq #611028)	Audience: AgriLife employees who may operate John Deere lawn equipment.
Contact: ehstraining@tamu.edu	Category: Agriculture
Course Equivalent: John Deere Riding Lawn Equipment Safety- TrainTraq #711019	
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Laboratory Safety (Classroom)  	
Description: This course reviews hazard communication (chemical safety), physical safety, and fire safety training required for new/newly assigned employees prior to working in areas resulting in exposure to hazardous chemicals.	
Delivery Format: In-Person (By Request) (TrainTraq #211126)	Audience: New/newly assigned employees prior to working in areas of exposure to hazardous chemicals.
Contact: ehstraining@tamu.edu	Category: Laboratory Safety

Online

In-person

By Request

Laboratory Safety (Online) 	
Description: This online course covers hazards associated with laboratory work; defines laboratory safety precautions, equipment, and recommended practices; and reviews expectations of laboratory personnel.	
Delivery Format: Online (TrainTraq #2114106)	Audience: New/newly assigned employees prior to working in a laboratory. Must be used as a refresher every three years after initial training.
Contact: ehstraining@tamu.edu	Category: Laboratory Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Laboratory Teaching Assistant (TA) Safety 	
Description: This online course provides an overview for the safety duties, regulations, and responsibilities for a Laboratory Teaching Assistant (TA) at Texas A&M University.	
Delivery Format: Online (TrainTraq #2112492)	Audience: Texas A&M University teaching assistants who supervise students in a laboratory or who are assigned this training by their hiring department.
Contact: ehstraining@tamu.edu	Category: Laboratory Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Large Capacity Van 	
Description: This course will educate employees and students on the safe operation of large capacity vans, regardless of how many seats are installed in the van, and how to identify and avoid associated hazards.	
Delivery Format: Online (TrainTraq #2114470)	Audience: This training is required annually for any driver of a leased or rented large capacity passenger van when Texas A&M University funds are used for payment.
Contact: ehstraining@tamu.edu	Category: General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).

Laser Safety 	
Description: This course reviews laser safety in the laboratory. It is also offered as a two-year refresher training for laser users.	
Delivery Format: Online (EHS)	Audience: Employees who work with Class 3B and Class 4 laser systems.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Magnetic Resonance Imaging (MRI) Safety 	
Description: This course provides MRI safety information and is intended for users of MRI for research and development.	
Delivery Format: Online (EHS)	Audience: Employees who use MRI machines.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Office Ergonomics 	
Description: This course introduces the basic principles of office ergonomics, components of office workstations, and how to prevent ergonomics-related injuries.	
Delivery Format: Online (TrainTraq #2113004)	Audience: All Employees
Contact: ehstraining@tamu.edu	Category: Ergonomics
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Online CPR/AED 	
Description: This course reviews CPR, AEDs, and first aid choking in all age groups.	
Delivery Format: Online (TrainTraq #2114469)	Audience: All Employees. May be required for certain staff and students. Must be completed prior to skills practice.
Contact: ehstraining@tamu.edu	Category: Automated External Defibrillators and General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).

Online Fire Extinguisher 	
Description: This course is designed to provide a basic overview of the science of fire, different types of portable extinguishers, and how to use the PASS method to extinguish a fire.	
Delivery Format: Online (TrainTraq #2114427)	Audience: All Employees. May be required for certain staff and students. Must be completed prior to hands-on training.
Contact: ehstraining@tamu.edu	Category: Fire and Life Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Personal and Organizational Safety Awareness 	
Description: This course is an overview of the resources available for students, faculty, staff, and visitors to reference for personal or general safety guidance at Texas A&M.	
Delivery Format: Online (TrainTraq #2114728)	Audience: All Employees
Contact: ehstraining@tamu.edu	Category: General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Pesticide Safety in the Greenhouse: Understanding and Applying the Worker Protection Standard (WPS) 	
Description: This course provides safety information to pesticide handlers and workers with work activities in greenhouses.	
Delivery Format: Online (TrainTraq #2113883)	Audience: Employees who are pesticide handlers/workers in greenhouses.
Contact: ehstraining@tamu.edu	Category: Agriculture
Course Equivalent: Pesticide Safety in the Greenhouse: Understanding and Applying the Worker Protection Standard (WPS)- TrainTraq #2113884	
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).

Precursor Chemical 	
Description: This course will familiarize you with the Memorandum of Understanding the Department of Public Safety and Texas Higher Education Coordinating Board has established to clarify responsibility in regard to Precursor Chemicals and Apparatus used in higher educational facilities.	
Delivery Format: Online (TrainTraq #2112860)	Audience: Employees who purchase, use, dispose of, or surplus precursor chemicals or apparatus that fall under the definition set by the state of Texas.
Contact: ehstraining@tamu.edu	Category: Laboratory Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Quantitative Fit Testing and Respiratory Protection  	
Description: This course is an overview of the Texas A&M Respiratory Protection Program, including basic instruction on the use of respirators, hazard recognition, and the completion of a quantitative fit test for approved respirator(s).	
Delivery Format: In-Person (By Request) (TrainTraq #211135 to register)	Audience: Employees who use respirators for protection from non-biological hazards.
Contact: ehsd.occ.health@tamu.edu	Category: Respiratory Protection

Radiation Producing Device for Human Use 	
Description: This course covers radiation safety fundamentals for users of human use X-ray machines. It is also offered as a two-year refresher training for users of human use X-ray machines.	
Delivery Format: Online (EHS)	Audience: Employees who use X-ray devices designed for human use.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Radiation Producing Device for Research 	
Description: This course covers radiation safety fundamentals for users of analytical X-ray units. It is also offered as a two-year refresher training for users of analytical X-ray units.	
Delivery Format: Online (EHS)	Audience: Employees who use analytical X-ray devices.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Radiation Producing Device Training for Users at the Vet Hospital 	
Description: This course covers radiation safety fundamentals for users of veterinary X-ray machines. It is also offered as a two-year refresher training for users of veterinary X-ray units.	
Delivery Format: Online (EHS)	Audience: Employees who use veterinary X-ray devices.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Radiological Safety Training-VMTH (Classroom)  	
Description: This course is required, by state law, for all Veterinary uses of Radioactive Material (RAM) and includes nuclear medicine diagnostic and therapy uses at VMTH. It is offered monthly and at the request of VMTH.	
Delivery Format: In-Person (Scheduled/By Request)	Audience: Employees at the Veterinary Hospital who handle radioactive materials or animals injected with radioactive materials, or work with radiation producing devices such as X-rays must complete this classroom training prior to handling.
Contact: radiological-safety@tamu.edu	Category: Radiological Safety

Safe Lifting 	
Description: This course introduces basic safe lifting techniques and outlines the appropriate steps to manually lifting and carrying a load.	
Delivery Format: Online (TrainTraq #2112675)	Audience: All Employees
Contact: ehstraining@tamu.edu	Category: General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

SEE Line Radiation Safety Training-Cyclotron Institute 	
Description: This course provides radiation training specific for those individuals who perform Single Event Effect (SEE) or similar experiments at the Cyclotron Institute.	
Delivery Format: Online (TrainTraq #2114160)	Audience: Visitors to the Cyclotron Institute who will work with SEE line.
Contact: ehstraining@tamu.edu	Category: Radiological Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Shop and Tool Safety 	
Description: This course highlights essential safety information and is intended for anyone working in shops and technical work areas or with tools and equipment commonly associated with those spaces.	
Delivery Format: Online (TrainTraq #2113364)	Audience: Employees who work in shops and technical work areas.
Contact: ehstraining@tamu.edu	Category: General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Slow Moving Vehicle (SMV) 	
Description: This course reviews vehicle markings, safety, and travel routes for Slow Moving Vehicles on the Texas A&M University Campus.	
Delivery Format: Online (TrainTraq #2112256)	Audience: All employees operating an SMV or passengers of an SMV.
Contact: ehstraining@tamu.edu	Category: General and Operational Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).

SPCC Awareness & Tank Inspector Training for Utilities & Energy Services (UES) 	
Description: This course covers requirements associated with inspection of oil storage tanks of multiple types; provides details about the campus Spill Prevention, Control, and Countermeasure Plan (SPCC); defines types of tanks and associated requirements; and communicates measures to be taken in the event of a release or spill.	
Delivery Format: Online (TrainTraq #2114216)	Audience: UES employees working in/around facilities that contain oil storage tanks.
Contact: ehstraining@tamu.edu	Category: Environmental Compliance/UES

Transportation Training for Moisture Gauge Users 	
Description: This course covers DOT regulations and radiation safety for moisture gauges. This course is required by DOT 49 CFR 172.704	
Delivery Format: Online (EHS)	Audience: Employees transporting soil moisture/density gauges over public roadways.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Veterinary Nuclear Medicine (RAM) Safety 	
Description: This course serves as a refresher training for the initial Radiological Safety Training.	
Delivery Format: Online (TrainTraq #2112382)	Audience: Veterinary staff and students who work with and around radiation.
Contact: hr-vmth@cvm.tamu.edu	Category: Radiological Safety
Course Prerequisite: Radiological Safety Training-VMTH (Classroom)- TrainTraq #2112734	
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).

Veterinary Teaching Hospital Radiation Producing Device (RPD) 	
Description: This course is required, by state law, for all individuals who will operate any Texas A&M radiation producing device (RPD) for veterinary purposes, or for any individuals who are in the room while any Texas A&M RPD is being utilized for veterinary purposes. It covers radiological safety basics as well as the state rules and Texas A&M safety policies and procedures regarding utilization of veterinary RPDs.	
Delivery Format: Online (TrainTraq #2114161)	Audience: Veterinary staff and students who work with and around radiation.
Contact: ehstraining@tamu.edu	Category: Radiological Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Veterinary Teaching Hospital Radiation Safety Awareness 	
Description: This course is designed to provide basic safety awareness for those who come into close contact with radioactive animals and radioactive areas in the veterinary hospital environment. It is primarily designed for animal caretakers and grooms, those who feed animals and clean animal areas but are unbadged, non-radiation workers (this does not include technicians, veterinary students, or veterinarians).	
Delivery Format: Online (TrainTraq #2112114)	Audience: Support staff who are non-radiation workers at the Veterinary School.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Waste Anesthetic Gas (WAG) Awareness 	
Description: This course is a general awareness training for anyone who works or supervises work with anesthetic gases administered to humans or animals.	
Delivery Format: Online (TrainTraq #2114681)	Audience: Employees working with anesthetic gases.
Contact: ehstraining@tamu.edu	Category: Occupational Health
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).

Wet Lab Radiology 	
Description: This course covers wet lab radiology training for visitors to the Veterinary School program.	
Delivery Format: Online (EHS)	Audience: Visitors to the Veterinary School who will work with wet lab operations.
Contact: ehstraining@tamu.edu	Category: Radiological Safety

Worker Protection Standard (WPS) for Pesticide Handlers and Workers 	
Description: This course complies with the requirements of CFR Title 40 §170.230 <i>Pesticide safety training for handlers</i> and CFR Title 40 §170.130 <i>Pesticide safety training for workers</i> .	
Delivery Format: Online (TrainTraq #2111553)	Audience: Pesticide Handlers and Workers
Contact: ehstraining@tamu.edu	Category: Agriculture
Course Equivalent: Worker Protection Standard (WPS) for Pesticide Handlers and Workers - TrainTraq #2111554	
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).	

Working Safely with Cryogenics 	
Description: This course reviews safety precautions, hazards associated with cryogenic work, storage and transportation of cryogenic materials, and safety equipment to be in place for personal protection.	
Delivery Format: Online (TrainTraq #211228)	Audience: Employees working with cryogenic materials.
Contact: ehstraining@tamu.edu	Category: Laboratory Safety
Note: Also accessible through the TrainTraq External Gateway (For persons non-affiliated with Texas A&M).
