

SAFETY NOTICE

Do you have any of these masks in your lab or work area?

Did you know that all of these are respirators, NOT dust masks?

The use of any respirator by a Texas A&M University employee is subject to prior review and approval by EHS.

- Do you use a respirator in your lab or work area?
- Do you feel respiratory protection might be needed?
- Do you work with any chemicals whose SDS indicates respiratory protection is required?
- Are you unsure if you have been properly trained to use your respirator?
- Has it been more than a year since your respirator was last fit tested?

If you answered **YES** to any of the above questions, you must notify EHS for evaluation of the hazard and enrollment in the TAMU Respiratory Protection Program. This program is free of charge to employees and includes respirator selection, annual medical surveillance, fit testing, and training.
