

# 24-HOUR LAB SAFETY SHORT COURSE

## Hosted by Texas A&M University, College Station

**Presented by The Laboratory Safety Institute**

### Introduction:

Thousands of safety professionals and educators have already attended this comprehensive short course. This Lab Safety BootCamp will appeal to those with responsibility for lab safety, or who must teach or practice safe laboratory procedures in an educational setting, hospital, government lab, private sector lab, or any other laboratory.

For over 35 years, LSI has been the nations only nonprofit educational institute for laboratory safety.

### Course Outline and Learning Outcomes:

Learn to identify and manage common laboratory hazards, and many you may not have considered. Discover how federal, state and local EH&S requirements apply to the laboratory environment, and how to improve regulatory compliance, reduce liability exposure, and convince others to care more about health, safety and the environment.

### Who Should Attend?

- ANYONE who wants a safer lab
- Environmental, Health & Safety Professionals
- Facilities Managers
- Lab Managers / Supervisors / Workers
- Researchers
- Risk Managers/ Operations Managers
- Safety/Security Directors
- School Administrators
- Science, Art & Technology Educators

### Registrants Receive:

- Seminar notebook as a PDF
- Certificate of Participation
- 2.1 Continuing Education Units (CEU's)
